

Blue Moon Missiles instructions

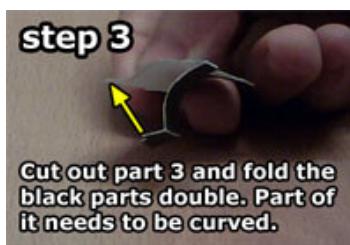

step 1

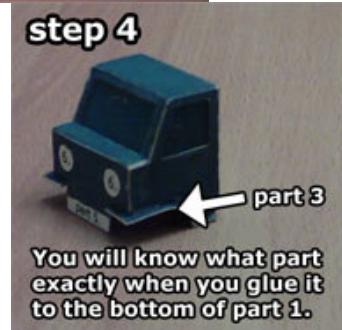

step 2

step 3

step 4

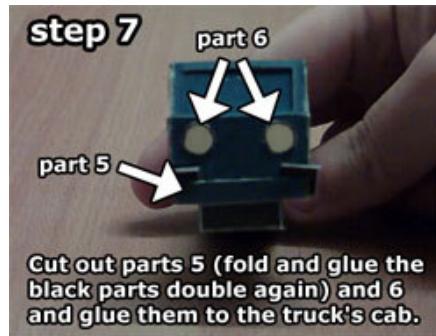

step 5

step 6

step 7

step 8

step 9

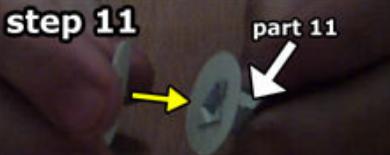

step 10

Cut out part 10 (don't forget to cut out the hole!) and fold the black parts double again. This part needs to be curved too, you will know how exactly when you glue it to part 4 (part of part 4 will stick through the hole: trim if necessary). The small flaps on the other end you can bend down at a 90° angle.

step 11

Cut out and assemble part 11, then "sandwich" the bottom glueing tabs between parts 12.

step 12

Cut out part 13 and push the axle (part 11) through the hole. DON'T glue part 11 to part 13, and DON'T close part 13 yet!

step 13

Cut out part 14 (don't forget the three holes!) but don't close the box yet. First assemble part 15 and glue it inside part 14...

step 14

...then (still not closing part 14!) push these parts over the axle (don't use any glue for this!) and fold down the glueing tabs on top of the axle (for this, you can and should use glue).

step 15

Glue on part 16, and finally close part 14.

step 16

Also finally close part 13, then glue the whole assembly to the back of the truck.

step 17

Part 18 goes on top of the tube you need to make out of part 17 as sort of a lid. Do the same for parts 19 and 20.

step 18

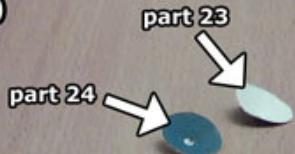

Roll part 21 into a cylinder as well, and push it through the holes on part 14. Trim the holes if necessary, but it's best if it's a tight fit. Don't glue part 21 to part 14!

step 19

Now glue parts 17 and 19 to part 21, using the glueing tabs on the holes on the sides. Make sure you don't accidentally glue the launch tubes to the turret.

step 20

Assemble parts 22, 23 (normal convex cone) and 24 (concave, hollow cone with the colored side in).

step 21 part 25

Glue part 22 on top of the turret, then part 23, then part 24 inside part 23, and part 25 onto the center of part 24 to top it off.

step 22

Lastly, assemble and glue on the wheels (parts 26-31).

step 23
